

/ CHEMICAL DEPARTMENT /

We offer inorganic pigments, masterbatch, PVC resin and functional ingredients with competitive prices.

1. Inorganic pigments

	Details	Application
Titanium Dioxide	Rutile(sulphur, chloride), Anatase	Paint, Ink, Plastic, Rubber, Paper
Carbon Black	Pigment, Rubber Grade	Paint, Ink, Plastic, Rubber
Calcined Kaolin	White pigment for weight saving	Paint, Ink, Plastic, Rubber
Talc	White pigment	Paint, Ink, Plastic, Rubber
Inorganic hollow sphere pigment	White pigment for weight saving and heat insulation	Paint, Ink, Plastic, Rubber

2. Resin and relative products

	Details	Application
Masterbatch	Color and Photoluminescent masterbatch	Plastic
PVC Resin	Various properties	Plastic

3. Functional Products

	Details	Application
Nano size ITO	IR shield and electric conductive material	Window film and coatings
Nano size ATO	IR shield and electric conductive material	Window film and coatings
Nano Silver	Wire, particle and flake	Electric conductive film, Antibacterial agent
Boron Nitride Nanotube	Heat conductive, Radiation shielding etc	IT device for heat-release, Electrical insulation products, Radiation shield products and others.
Galinstan	Liquid metal	Use this material instead of mercury
Photoluminescent pigment and products	Powder, Film(PVC, PET), Thermal transfer film, Gravels	Safety sign, Sundry goods and etc.

Above products are MADE IN CHINA, KOREA and TAIWAN

Photoluminescent Products

Film (PVC, PET)

SHEET(PVC)

Gravel
